

EDUCATION

Brigham Young University
Ph.D. in Mechanical Engineering

Provo, Utah
April 2020–Current

- Advisor: Dr. Marc Killpack
- Emphasis in Robotics and Controls

Brigham Young University
B.S. in Mechanical Engineering, GPA: 3.70/4.00

Provo, Utah
April 2020

EXPERIENCE

Robotics and Dynamics Laboratory
PhD Student

Provo, Utah
Current

- Dissertation topic: “Modeling, Planning, and Control for Whole-Body Manipulation of Unknown Objects with Large-Scale Soft Robots”
- Funded by a grant from the NSF EFRI Program.

Brain Inspired Robotics Laboratory
Visiting Researcher

Pisa, Italy
May 2023-Aug 2023

- Worked on reinforcement learning for whole body manipulation of large objects with a soft robot torso.

BYU Mars Rover Team
Mechanical Team Lead

Provo, Utah
2019-2020

- Led a team of 15 students for the University Rover Challenge (URC), an international competition challenging student teams to design and build the next generation of Mars rovers.
- Responsible for the mechanical design of a dexterous robotic manipulator capable of pushing buttons, opening doors, and typing.
- See <https://www.youtube.com/watch?v=BoTr3ki3cUQ>

IM Flash Technologies (an Intel-Micron Joint Venture)
Automation Engineering Intern

Lehi, Utah
Summer 2019

- Designed and implemented an automated cleaning system to clean toxic chemicals from semiconductor manufacturing equipment.

National University of Singapore
International Product Design

Singapore
May 2017

- Designed and implemented an automated cleaning system to clean toxic chemicals from semiconductor manufacturing equipment.

TEACHING AND MENTORING

- **Research Mentor** at Brigham Young University 2021-Present
Soft Robot Design Project
 - Lead several groups undergraduate students (15-20 in total) on a project to design a large scale soft robot torso with tactile sensing.
- **Teaching Assistant** at Brigham Young University 2017-2019
Introduction to Mechatronics
 - Instructed over 150 students in the design and control of small mobile robots for a class competition.
 - Oversaw weekly labs involving PCB design, embedded programming, and signal processing.

SKILLS

- **Programming and Software:** Python, C++/C, MATLAB, L^AT_EX, ROS, PyTorch, MuJoCo, Autodesk Eagle, Drake
- **Technical:** Model Predictive Control, Linear/Nonlinear Optimization, Deep Learning, Dynamical System modeling, Adaptive Control, Force Control, Path Planning, Physics Simulation, Genetic Algorithms, Reinforcement Learning
- Fluent Spanish Speaker

PROJECTS

See projects and details on curtiscjohnson.github.io/projects.
